PRODUCT CERTIFICATE

Cyber Security

This certificate attests that satisfactory evidence has been established, through applicable methodologies, that the requirements set out in the listed standard(s) and applicable Nemko procedures have been met. The details on the evaluations of conditional requirements of the cyber security standard are to be found in the test report on which this certificate is based.

The certification scheme is managed by Nemko AS according to the requirements of ISO/IEC 17065 and ISO/IEC 17020.

The conformity assessments are based on the documentation and information provided by the customer about the certified product and the management system concerned. The validity of the certificate preconditions that Nemko has had access to all relevant information, and that the holder of the certificate complies with the requirements for issuance and maintenance of the certificate at any point in time. In particular, the holder of the certificate shall inform Nemko of any modifications in the product, relevant changes in the corresponding management system or any other circumstances that may affect the conformity of the product to the applicable requirements. The validity period of this certificate depends on its continued maintenance. This can be checked at Nemko.com.
